

work smarter, not harder

ECO-POST PULLER

GET THE JOB DONE IN HALF THE TIME, PHYSICAL EFFORT & MONEY.

The Eco-Post Puller is the last post remover you'll need. This patent pending machine is everything you need to pull a post in about 45 seconds with no additional tools, tractors or electricity. Finally say goodbye to the physical and tedious hard work of post removal and say hello to fencing freedom.

The Eco-Post Puller is designed to remove the most common-sized wood posts and can also extract all shapes of metal posts, including bent t-posts. With the Eco-Post Puller one person is capable of applying up to 3.5 tons of lifting force in a single operation, and it can be used on any ground surface from soft loose soil to the toughest and most harsh terrains.

WHY ECO-POST PULLER? ONE TOOL DOES IT ALL

The Eco-Post Puller consistently and easily removes any types of post regardless of soil conditions, it will make projects easier saving you valuable time, physical effort and money.

- Better stability due to a wider base (29.25in x 18.25in)
- Minimized ground sinking due to an oversize base footing surface
- Ability to remove concrete footings up to 17 ½" in diameter
- Quick Post Removal Time – 45 Seconds for Most Applications
- Remove larger diameter posts with 6" Jaws for post extraction
- Easy to Handle and Position
- Easy positioning and handling with the 11" three point contact handle and footing axle cross bar
- Faster and Safer post wheel out
- Greater strength and better leverage balance due to taller double support tower at 66.125in
- Extended durability on Eco-Last Never Flat Tires due to precision ball bearings and grease ports
- One pin removal multi-use Hi-Lift Jack - allowing versatility with other jack components (included)
